

## **1949-1953 FORD/MERCURY CATALOGUE**

**Effective 2017**

Dear Customer,

Attached is our latest catalogue of offerings. We sincerely hope that this new catalogue will not only be easier to read and follow, but that it contains some additional products to ease your restoration tasks.

For those of you not familiar with our operation, you may be surprised to find that we are "restorers" first, and "suppliers" second. We openly compete in national competitions not only to satisfy our personal desires, but also to keep in touch with the problems facing today's restorers. To our knowledge, we are the only major Ford supplier to do this. We intend to continue these pursuits and urge other suppliers to do likewise.

It is not our intention, however, to compete in the market place with other suppliers. We started offering our own products because they could not be obtained elsewhere, or in some cases, the available reproduction was not to our exacting standards. Likewise, we have no dealer network. We prefer to work one on one with our customers and attempt to supply only those items that are desired and/or required.

Our facility is located less than 1 mile from I-275, 10 minutes from the Detroit Metro Airport Complex, and approximately 20 short miles southwest of the Henry Ford Museum/Greenfield Village complex in the "Heart of Ford Country". We invite anyone traveling to the Dearborn/Detroit area to give us a call to assure our presence, and stop for a visit. You are more than welcome to tour our facility.

Our core operating hours are 9:00AM until 11:00PM Eastern Standard Time Monday through Thursday and 9:00 AM until 5:00 PM Friday, Saturday, and Sunday. Our phone and fax line is tended electronically when we are not available. Specific questions, special requests, etc. are handled by Roy or his staff during normal business hours.

We appreciate your continuing support and suggestions for new products. Remember, the parts listed in this catalogue are used on our own vehicles (that's why we have them). We advertise on paper, but we prove our products on the road and on the Concourse. We don't just sell parts; we provide pride, points, and fellowship.

*Roy Nacewicz*

## Catalogue Notes...and the "Legal Stuff"

All items sold herein are available via UPS or the U.S. Postal Service. Any order can be paid by check, money order, or VISA , MASTERCARD, Discover and American Express credit cards. We also offer UPS C.O.D. shipments. (You must provide a street address for any UPS order). It should be noted that the current UPS C.O.D. charge is \$12.50 per package in addition to normal shipping costs. Please do not send cash for any order.

As many items contained herein are of limited supply, all are offered subject to prior sale.

All prices are per each unless otherwise indicated, and all shown herein are subject to change without prior notice.

All merchandise is sold without warranty, expressed or implied, except that your satisfaction is guaranteed on all items used as originally intended or purchase price will be refunded with proof of purchase if item(s) are returned unused within thirty (30) days of invoice date. Any returned item must be shipped prepaid to us or the cost of shipping will be deducted from the refund.

Shipments abroad are welcome: however, they must be prepaid in U.S. funds by check, money order, Credit Card or PAYPAL. Please allow for additional shipping charges for non U.S. addresses, depending on method of shipment desired.

Our minimum order is \$25.00 not including shipping expense. Orders submitted for less than this amount will not be accepted.

Our shipping charge policy:

**WE DO NOT MARK UP SHIPPING CHARGES OVER ACTUAL COST.**

**We ship the most economical method possible.**

**Currently, for small orders, we utilize Priority Mail which is by far the least expensive, trackable shipping method for relatively small packages.**

**Once size or weight becomes a factor, UPS is our preferred carrier.**

**We are able to calculate the weight/size of your order and we charge your account exactly the fee UPS collects from us.**

On a related note, our friends must realize that any specified expedited shipping (i.e.: red label, blue label, Priority Overnight Mail, etc.) merely dictates the speed of the delivery once it leaves our facility. Since all but a few items are available on sight, we make every effort to turn orders

around in two to three days. We assign "order fill sequence" in accordance with time of order receipt, regardless of order size. On occasion, we may hold a shipment for a few additional days while awaiting fresh plating, receipt of components produced off sight, or rework or re-production of items that do not meet our exacting standards. Obviously, any custom work is dependent on stock and machine availability. We have always lived by the belief that speed is not worth a concession in quality.

Since all kits for all orders are custom made on an individual basis from components on hand, we cannot merely go to a warehouse and "pick" an order and ship it within a few hours. **If you encounter a critical supply situation, (and we certainly know what those are like), please call us and we will make every attempt to fill your order on an "after hours" basis at a nominal additional charge. Likewise, if there is one or more particular items in a large order that require expedited shipping; please let us know....we will do what it takes to make it happen!**

## **ENGINE/TRANSMISSION:**

<b><u>J-94-01</u></b>	<b>Transmission inspection plate attachments. 11 self tapping indented hex head integral washer screws in original S-2 finish. 1949-53</b>	<b>\$ 5.95/pkg</b>
