

Model A Ford CATALOGUE

1928-1931

Effective 2017

Dear Customer,

Attached is our latest catalogue of offerings. We sincerely hope that this new catalogue will not only be easier to read and follow, but that it contains some additional products to ease your restoration tasks.

For those of you not familiar with our operation, you may be surprised to find that we are "restorers" first, and "suppliers" second. We openly compete in national competitions not only to satisfy our personal desires, but also to keep in touch with the problems facing today's restorers. To our knowledge, we are the only major Ford supplier to do this. We intend to continue these pursuits and urge other suppliers to do likewise.

It is not our intention, however, to compete in the market place with other suppliers. We started offering our own products because they could not be obtained elsewhere, or in some cases, the available reproduction was not to our exacting standards. Likewise, we have no dealer network. We prefer to work one on one with our customers and attempt to supply only those items that are desired and/or required.

Our facility is located less than 1 mile from I-275, 10 minutes from the Detroit Metro Airport Complex, and approximately 20 short miles southwest of the Henry Ford Museum/Greenfield Village complex in the "Heart of Ford Country". We invite anyone traveling to the Dearborn/Detroit area to give us a call to assure our presence, and stop for a visit. You are more than welcome to tour our facility.

Our core operating hours are 9:00AM until 11:00PM Eastern Standard Time Monday through Thursday and 9:00 AM until 5:00 PM Friday, Saturday, and Sunday. Our phone and fax line is tended electronically when we are not available. Specific questions, special requests, etc. are handled by Roy or his staff during normal business hours.

We appreciate your continuing support and suggestions for new products. Remember, the parts listed in this catalogue are used on our own vehicles (that's why we have them). We advertise on paper, but we prove our products on the road and on the Concourse. We don't just sell parts; we provide pride, points, and fellowship.

Catalogue Notes...and the "Legal Stuff"

All items sold herein are available via UPS or the U.S. Postal Service. Any order can be paid by check, money order, or VISA , MASTERCARD, Discover and American Express credit cards. We also offer UPS C.O.D. shipments. (You must provide a street address for any UPS order). It should be noted that the current UPS C.O.D. charge is \$12.50 per package in addition to normal shipping costs. Please do not send cash for any order.

As many items contained herein are of limited supply, all are offered subject to prior sale.

All prices are per each unless otherwise indicated, and all shown herein are subject to change without prior notice.

All merchandise is sold without warranty, expressed or implied, except that your satisfaction is guaranteed on all items used as originally intended or purchase price will be refunded with proof of purchase if item(s) are returned unused within thirty (30) days of invoice date. Any returned item must be shipped prepaid to us or the cost of shipping will be deducted from the refund.

Shipments abroad are welcome: however, they must be prepaid in U.S. funds by check, money order, Credit Card or PAYPAL. Please allow for additional shipping charges for non U.S. addresses, depending on method of shipment desired.

Our minimum order is \$25.00 not including shipping expense. Orders submitted for less than this amount will not be accepted.

Our shipping charge policy:

WE DO NOT MARK UP SHIPPING CHARGES OVER ACTUAL COST.

We ship the most economical method possible.

Currently, for small orders, we utilize Priority Mail which is by far the least expensive, trackable shipping method for relatively small packages.

Once size or weight becomes a factor, UPS is our preferred carrier.

We are able to calculate the weight/size of your order and we charge your account exactly the fee UPS collects from us.

SPRING CLAMP RIVETS for 1931 Models:

Although some claim that the late 1930 Model A incorporated rivets on the front and rear spring clamps, instead of 1/4-20 bolts, we certainly know that the 1931 Model Year cannot be denied. Per your many requests, we have now made this product available for you. Except for the length which has been specially tuned for the Model A application, these components are identical to those that we have supplied the V-8 guys for over 20 years.

These special do-it yourself (easily, with no special tools or expertise) press-together fasteners simulate exactly the appearance and function of rivets when installed. Here is the better mousetrap for those of us who would like to **duplicate the rivet attachment of spring clamps**, but who haven't the facilities at home to do so. When you see these, you'll wish, as we did, that you had thought of it years ago, especially since they can be substituted on a completed spring assembly without disturbing the paint! For use as an easy way out of a point deduction, or a clean, no-hassell way to complete a relatively cumbersome task even during initial assembly.

FENDERS

FENDER WELTING-our own reproduction of original Ford Pyroxylin cloth covered, paper twine-filled fender welting. This is machine sewn, in house, utilizing original materials. The "Box grain" generated on the pyroxilyn cloth is unique to our product. All other welting on the market is produced from extruded vinyl and therefore the "box" pattern is not achievable. Our material is produced on one of the original tools used by one of Ford's primary suppliers. Likewise, the twisted paper core is still produced for us by an original Ford supplier.

B-108-P	If one looks closely at available factory photos taken in the Model A era and compares the shading of the engine fan belt to other rubber components, etc, he can not help but conclude that they were different colors. Fortunately we have been able to find enough documentation, photos and NOS belts to develop a special color agent to change your black, post-war service (or modern replacement) fan belt to the correct brown. Special fan belt coloring agent (it really does the job – one that normal paints can't do)	\$ 24.95/half pint

AT LONG LAST, - An Explanation of Interior Trim Screws!!!

Have you noticed that unlike the others, we do not offer "complete" interior trim screws kits? You know the ones that we have all bought that consist of a hand full of screws and washers that have a variety of finishes from cad to zinc with a little stainless thrown in. The old "one kit fits all" theory personified! Forget that some interior screws were nickel plated, and others were S-15 (Oxidized) ect. etc., and some screws are # 10 and others are # 8 and some used finish washers and some did not.

Well, we still do not offer specific kits because of the complexity involved, but if a restorer wishes, he can select the needed screws etc. for his project from our catalogue offerings listed below.

Nickel plated interior Trim Screws: # 8 and #10 trim screws with slotted oval heads as original (1928-31)

R-86-20	#8 x 3/4" long screws (20 pcs/pkg)	\$ 5.95/pkg
R-86-21	#8 x 1 1/4" long screws (20 pcs/pkg)	\$ 5.95/pkg
R-86-21-A	#10 x 1" long screws (10 pcs/pkg)	\$ 5.95/pkg

The following hardware is furnished in Ford S-15 finish.

We broke the color barrier on this one so you die-hards wont have to get out the gray paint anymore.

NOTE: The S-15 or "oxidized" hardware was used in a variety of places on interior components where the fasteners were meant to "disappear" rather than "stick out at you". Some examples are door and quarter trim panel edges and corners, headers, kick panels, headliners, etc.

R-95-06	# 8 Slotted Oval x 3/4 in S-15 finish (10 pcs/pkg)	\$ 4.95/pkg
R-95-06-A	# 8 Slotted Oval x 1 1/4 in S-15 finish (10 pcs/pkg)	\$ 4.95/pkg
R-95-07	# 8 Countersunk finish washers in S-15 finish (10 pcs/pkg)	\$ 4.95/pkg
R-95-08	# 10 Slotted Oval x 3/4 in S-15 finish (10 pcs/pkg)	\$ 4.95/pkg
R-95-09	# 10 Countersunk finish washers in S-15 finish (10 pcs/pkg)	\$ 4.95/pkg
R-95-10	Our old reliable" R-019 in S-15 finish.	\$ 4.95/pkg

We are growing and the new offerings keep on coming

Here are some additional items too new to be placed in the catalogue, however they are available for immediate shipment

R-08-02	<p>Vacuum tubing (rubber) that <u>looks</u> and <u>feels</u> like the original cloth wrapped rubber hose. If you are just plain tired of having to settle for modern rubber hose like we have had to do on occasion because the original cloth covered hose is long gone except for a few surviving pieces that are dry rotted and crack when you bend it, then this item is for you!</p> <p>Used on all cars and commercial vehicles through at least 1940 for wiper vacuum application. So very visible on some vehicles, especially open cars, you just want to cry when installing modern rubber hose because it is so out of place. Well, put away the Kleenex! We solved the issue!</p> <p>Now our clip (T-95-01, page 39 in the catalogue and chrome Vacuum tubes listed in the catalogue have something of substance and originality to work with on open cars and all cars and commercial vehicles can show off original look and feel vacuum tubing where exposed!</p>	\$15.00/ per 3 ft length
R-08-04	<p>Special "Pole Screws" for generator and starter motor application. These are the special visible slotted screws that go through the generator and starter motor case and attach the steel plates that retain the fields. These slotted screws were used from 1928 through at least the mid to late 30's and always take a beating when removal is necessary. (replaced in production and in service with the more modern square insert drive version, the one so commonly seen on many "rebuilt") The absence of these original slotted screws is an almost guaranteed point deduction. (Sold in packages of 4 screws)</p>	\$ 9.95/set
R-08-05	<p>Light Switch "Spider" (1932 through 1939) This intricate stamping fits on the square at the end of the Light Switch Rod and activates the light switch when the rod is rotated. Spring loaded in assembly by the sister offering following, it becomes a "must item" for proper light switch function.</p>	\$ 8.95/each
R-08-06	<p>Spring for above "Spider" mechanism. Used in conjunction with the never to be forgotten "C" clip offered on page 6 (our kit R-93-06).</p>	\$ 3.00/each
R-08-07	<p>Special 3/16 diameter rivets with a 7/16 truss head for various body substructure assembly on 1932 and some 1933 and 1934 models as well as later commercial vehicles. When you need these, you know it and nothing else will suffice. (Sold in packages of 10 pieces)</p>	\$ 4.95/pkg

On a related note, our friends must realize that any specified expedited shipping (i.e.: red label, blue label, Priority Overnight Mail, etc.) merely dictates the speed of the delivery once it leaves our facility. Since all but a few items are available on sight, we make every effort to turn orders around in two to three days. We assign "order fill sequence" in accordance with time of order receipt, regardless of order size. On occasion, we may hold a shipment for a few additional days while awaiting fresh plating, receipt of components produced off sight, or rework or re-production of items that do not meet our exacting standards. Obviously, any custom work is dependent on stock and machine availability. We have always lived by the belief that speed is not worth a concession in quality.

Since all kits for all orders are custom made on an individual basis from components on hand, we cannot merely go to a warehouse and "pick" an order and ship it within a few hours. **If you encounter a critical supply situation,** (and we certainly know what those are like), **please call us and we will make every attempt to fill your order on an "after hours" basis at a nominal additional charge.** Likewise, if there is one or more particular items in a large order that require expedited shipping; please let us know....we will do what it takes to make it happen!
